Report on seminar on financial literacy in college students

Date: 20-02-2023

Venue: Geography lab

Resource person: Mr. Vidit Ajmera, HR Department, AU Small finance

Introduction—The seminar on “**financial literacy**” held at S.S.G Pareek P.G.College designed to make a comprehensive understanding in college students about financial management. Financial literacy education helps students develop responsible spending habits and understand the difference between needs and wants. By learning to distinguish between essential expenses and discretionary spending, students are more likely to make prudent choices and avoid unnecessary debt. The key speaker of seminar **Mr. Vidit Ajmera** developed an insight for financial management in the students through his lecture and group interaction. The seminar covered different aspects of financial management-

- Need of financial literacy
- Importance of saving
- Investment strategies

Financial literacy is also closely linked to financial independence. By equipping students with the skills to manage their finances effectively, they become less reliant on others for financial support. This sense of independence is empowering and encourages students to take control of their financial futures with confidence.

Furthermore, financial education fosters a sense of financial responsibility and accountability. Students learn the value of money and the effort required to earn it. This understanding promotes responsible behaviour, discourages reckless spending, and encourages saving for future goals.
